Inofix diseña productos pensando en las personas.

Inofix designs products with people in mind.

Creemos que el diseño lo es todo, porque está en todo. Hasta en los objetos más cotidianos, que muchas veces pasan desapercibidos.

Queremos darle valor al diseño diario. El que observa el día a día de todas las personas, lo entiende y lo mejora.

El que da importancia a todos y cada uno de los detalles. Y el que busca el equilibrio perfecto entre la funcionalidad y la estética.

Para así, hacer que la vida de las personas sea un poco más sencilla, y además, un poco más bella.

We believe that design is everything, because it is in everything. Even in the most everyday objects, which often go unnoticed.

We want to give value to everyday design. The one who observes the day-to-day life of everybody, understands that and makes it better.

The one who gives importance to each and every one of the details. And the one looking for the perfect balance between functionality and aesthetics.

To make the life of people are a little simpler, and also, a little more beautiful.

Buscando el equilibrio entre lo útil y lo bello.

Seeking balance between
the useful and the beautiful.

Inofix
nace el año
was born in
1972

Desde entonces mantenemos la idea
inicial de fabricar y comercializar
productos de diseño propio en el sector
de la ferretería y bricolaje.

Since then, we have remained true to our
initial idea of manufacturing and
selling our own design products in the
hardware and DIY sector.

PRESENCIA INTERNACIONAL

La proyección hacia mercados exteriores ya es una realidad en los inicios de la empresa, pero es a partir del año 1986 que se apuesta por el crecimiento en esta dirección con la participación en ferias internacionales. Actualmente Inofix está presente en 35 países y en más de 15.000 puntos de venta.

INTERNATIONAL PRESENCE

The projection towards foreign markets is already a reality in the beginnings of the company, is from the year 1986 when it is committed to growth in this direction with participation in international fairs. Inofix is currently present in 35 countries and in more than 15,000 points of sale.

SOSTENIBILIDAD Y MEDIO AMBIENTE

Establecemos políticas sostenibles y procedimientos respetuosos con el medio ambiente. En 1998 se firma contrato con la organización Ecoembes para la Gestión Integral de Residuos. Posteriormente nos adherimos al Plan Sectorial de Prevención, donde la empresa se compromete a reducir progresivamente los envases de sus productos.

En el año 2013 Saint Genís S.A. obtiene los certificados PEFC y FSC con el objetivo de incentivar el cuidado y trato con el medio ambiente así como también el uso responsable de nuestros bosques. Con estos certificados garantizamos que la actividad de nuestra empresa se está desarrollando bajo criterios de sostenibilidad forestal.

Todos nuestros productos presentados en formatos blíster, están cambiando progresivamente de PVC a RPET. El material conocido como RPET (tereftalato de polietileno) es plástico PET 100% reciclado y 100% reciclable. Asimismo, todo el cartón utilizado en las cajas y presentaciones de nuestros productos cuenta con una certificación de 80% del material reciclado, mientras que en cajas de embalaje y cajas de envío la certificación es del 100%.

SUSTAINABILITY AND THE ENVIRONMENT

We have adopted sustainable policies and environmentally procedures. In 1998, we signed an agreement with Ecoembes, a not-for-profit organisation that devises integrated waste management systems. Subsequently, we signed up to a sector-based waste prevention plan, whereby the company made a commitment to gradually reduce the packaging of its products.

In 2013, Saint Genís, S.A. obtained the Pan European Forest Certification (PEFC) and FSC in order to encourage environmental protection, as well as the responsible use of our forests. By holding these certifications, we are able to guarantee that our company conducts its business according to sustainable forestry criteria.

All our products presented in formats blister packs, they are progressively switching from PVC to RPET. The material known as RPET (polyethylene terephthalate) is 100% recycled and 100% recyclable PET plastic. Also, all the cardboard used in the boxes and presentations of our products have a certification of 80% of the recycled material, while in packaging boxes and shipping boxes the certification is 100%.

DISEÑO E INNOVACIÓN

El desarrollo de nuestros propios diseños y nuevos conceptos de producto, a menudo patentados, nos permite diferenciarnos y posicionarnos en la mente del consumidor como marca de referencia en diseño y calidad. Apostamos por productos que aporten valor añadido, pensando más allá de la mera funcionalidad.

DESIGN AND INNOVATION

By developing our own designs and new concepts, most of which are patented, we have been able to set ourselves apart from the rest to become a leading brand of design and quality in the minds of consumers. We are committed to products that provide added value, thinking beyond mere functionality.

Double function: door stop
+ magnetic retainer.

1

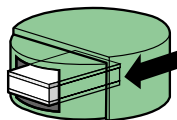

POSICIÓN TOPE

Actúa como tope con impacto amortiguado. El imán está escondido y no actúa con los impactos normales.

DOOR STOP POSITION

Acts as a stop, cushioning the impact. The magnet is at rest and does not come into action on impact.

2

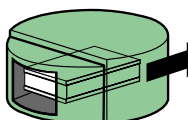

POSICIÓN RETENEDOR

Presionando la puerta contra el tope, la plaquita metálica atrae al imán y la puerta queda retenida.

RETAINER POSITION

When the door is pushed against the stop, the magnet moves and the door is held.

3

RETORNO AUTOMÁTICO

Separando la puerta del tope, el imán vuelve automáticamente a su posición de reposo.

AUTOMATIC RETURN

When the door is moved away from the stop, the magnet returns automatically to its position.

¿Cuál es la frontera entre el frío y el calor?

Where is the frontier between cold and warmth?

AHORRO DE ENERGÍA
ENERGY SAVING

Con nuestros burletes, aislantes del frío y del calor, se consigue una inmejorable protección térmica y un gran ahorro de energía.

Ours draught excluders afford unbeatable insulation against cold and heat, resulting in savings on fuel bills and ensuring a pleasant atmosphere indoors.

BURLETES DE SILICONA

SILICONE DRAUGHT EXCLUDERS

CARACTERÍSTICAS TÉCNICAS:

- Los burletes de silicona poseen propiedades especiales debido a que son elaborados con uno de los materiales más nobles.
- Conserva sus excelentes propiedades mecánicas a temperaturas extremas (desde -100°C hasta +250°C).
- Larga vida útil (más de 10 años). Mantiene sus propiedades con el paso del tiempo.
- Sometido a compresión siempre recupera su forma inicial. Amplio rango de aplicación: de 1 a 7 mm.
- Gran resistencia a la intemperie (UV ozono). Repele el agua.

TECHNICAL SPECIFICATIONS:

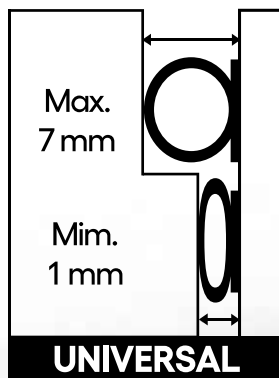

- Silicone draught excluders have special properties because they are made from one of the finest materials.
- They maintain their excellent mechanical properties at extreme temperatures (from -100°C to +250°C).
- Long service life (more than 10 years). They maintain their properties over time.
- After they have been under pressure, they always return to their initial shape. Wide range of application: from 1 to 7 mm.
- High weather-resistance (UV-ozone). Water-repellent.

BURLETES DE CAUCHO

RUBBER DRAUGHT EXCLUDERS

CARACTERÍSTICAS TÉCNICAS:

- Burletes de EPDM, un caucho-polímero que posee excepcionales características como aislante.
- El EPDM es resistente a la intemperie y al viento. No se resquebraja.
- Conserva su elasticidad y su forma tras prolongados períodos de uso.
- Se adapta a espacios de distinta anchura.
- No absorbe el agua gracias a que las celdas que componen este tipo de caucho son cerradas.
- Adecuado hasta temperaturas extremas: -50°C a +70°C.
- Larga vida: de 7 a 9 años.

TECHNICAL SPECIFICATIONS:

- Draught excluders made of EPDM, a polymer rubber with exceptional insulating properties.
- EPDM is weather-resistant and wind-resistant. It does not crack or split.
- It keeps its elasticity and shape even after prolonged use.
- It adapts to spaces of different widths.
- It does not absorb water as the cells in this type of rubber are closed cells.
- Suitable for extreme temperatures: -50°C to +70°C.
- Long lasting: 7 to 9 years.
